

SPOTLIGHTING OUR PEOPLE

ARCHITECTURE + INTERIORS

Celebrated the first Monday of every October, we're recognizing World Architecture Day by spotlighting our incredible Architecture and Interior Design team.

With more than 40 experienced architects and interior designers, American Structurepoint works holistically to create captivating and engaging spaces. Our team of national leaders are experts at blending function and form to design buildings and spaces for diverse market sectors and clients.

American Structurepoint's architects and interior designers are delivering a significant project in Michigan City, Indiana, that will provide upscale, luxury apartments and an opportunity for economic development. The mixed-use facility is near the South Shore Line, which provides a quick route to nearby

Chicago. Our interiors team designed the space to pay homage to the nearby train station.

We are also improving the employee experience by renovating the SK Food Group facility in Cleveland, TN. By focusing on the employee and client paths, our team is creating a facility that focuses on wellness while balancing office and manufacturing areas. The facility will feature a new test kitchen and lounge to promote wellbeing and provide an inviting space for clients.

This World Architecture Day, please join us in celebrating our architecture team and their dedication to improving the quality of life for the people and communities we serve.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
