

PROJECT

SPOTLIGHT

At American Structurepoint, our people are driven to make a difference every day. We're committed to our clients and the long-term partnership we have with them. One example is our partnership with the Indianapolis Airport Authority, which governs the Indianapolis International Airport.

American Structurepoint's investigative engineers performed roof condition assessments on 32 of the airport's structures, which identified immediate and future maintenance and replacement needs. Having this information allows the Airport Authority to plan proactively for when and how much

to budget for repairs or replacement of buildings' roofs so the Indianapolis International Airport can remain a best-in-class facility that accommodates more than 7 million travelers per year.

At American Structurepoint, our projects are more than a job to us, and we are committed to improving the quality of life for the people and communities we serve. No matter the size or scope of a project, our experts are dedicated to working with you to successfully deliver results.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
