

# PROJECT

## SPOTLIGHT

At American Structurepoint, we specialize in transformational projects and designing venues that improve the quality of life for the people and communities we serve.

A recent example is the new 220,000-sft **Mishawaka Fieldhouse**, which will serve as a youth and adult sports destination for the Northern Indiana region.

American Structurepoint structural engineers partnered with City of Mishawaka leaders, construction manager Meyer Najem, architect krM Architecture, and fieldhouse owner Card & Associates to bring this cutting-edge fieldhouse to life. This state-of-the-art facility will be a vibrant recreational hub for the region.

The fieldhouse includes 19 volleyball courts that can be converted to 10 parquet basketball courts; 12 pickleball courts; one turf field available for soccer, baseball/softball, and flag football; a weight room and gym area; batting cages; and 15,000-sft of leasable tenant space. A championship basketball court features a seating capacity of 1,000 spectators.

The fieldhouse is one of the largest sports complexes in Indiana. It has the largest indoor pickleball area outside of Indianapolis and the largest artificial indoor turf field in Northern Indiana.

Area residents will benefit from the additional sports recreation opportunities available to youth and adults. These include a volleyball club with 180 teams and basketball and baseball clubs with over 20 teams each. The facility will positively impact Mishawaka's economy by attracting an expected one million visitors annually, generate 20,000 additional hotel stays in the area each year, and add \$10 to \$12 million in revenue to the local economy each year. Tournaments at the fieldhouse are scheduled every weekend from January through May 2025.

American Structurepoint professionals are driven to make a difference every day. We are proud to have partnered with Meyer Najem and Card & Associates to create a sports destination that will provide recreational opportunities and drive economic vitality in Northern Indiana for decades to come.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
