

PROJECT

SPOTLIGHT

American Structurepoint has partnered with the City of Greensburg, Indiana, on three **community planning programs**. These programs lay out plans and strategies community leaders can use to shape the city's future and improve the quality of life in Greensburg.

With a population over 11,000, Greensburg is located 51 miles southeast of Indianapolis. City leaders are eager to entice new residents, businesses, and attractions to help the city grow and prosper.

American Structurepoint's planning experts joined with city leaders to develop a comprehensive plan that provides the overall vision and direction needed to guide Greensburg's healthy growth for the next 10 years.

American Structurepoint planners created the city's first bicycle and pedestrian master plan with strategies to improve and build paths and trails for bicyclists, runners, and walkers.

American Structurepoint planners and engineers also partnered to deliver the City of Greensburg a capital improvement plan and program (CIPP) that identifies and ranks road and trail projects over the next 20 years and then prioritizes the projects with the highest ranking for implementation with a five-year period.

American Structurepoint defines the standard of excellence for people across the world who want help building and bettering their community. We help clients find the hidden challenges and opportunities in every project, which leads to better outcomes. We are grateful to join with Greensburg residents to define plans for future growth and better roadways and railways. American Structurepoint is here to help you plan for the growth of your community.

AMERICAN STRUCTUREPOINT IS A FULL-SERVICE ARCHITECTURE AND ENGINEERING FIRM.
